

hey june

happy tank

THE HAPPY TANK is a fun, summery racerback style tank top in sizes 2T - 14. It features four braided straps and an a-line swing top. This top is perfect for all your summer adventures, from hiking to hitting the theme park and everything in between! Inspired by the Happy Home line of knit fabrics from Sew Caroline, the Happy Tank is sure to make your girl smile!

FABRIC REQUIREMENTS: Sizes 2 - 4 require 1/2 yard of 60" wide stretch knit fabric. Sizes 5 - 14 require 1 yard of 60" wide stretch knit fabric. Use lightweight stable knits with at least 30% stretch, such as 100% cotton jersey and cotton spandex.

SIZING: Below are finished garment measurements in inches (rounded to the nearest 1/4 inch). Because of the swing style, the chest is meant to fit slightly loose.

SIZE	2	3	4	5	6	7	8	9	10	11/12	13/14
chest	22.5	23	24	25	26.25	27.25	28.5	29.5	30.5	32.5	34.5

TERMS OF USE: Purchase includes the right to sell garments made with this pattern. However, it is illegal to copy, share, distribute, or resell the pattern, illustrations, or instructions. Please respect the copyright and direct any requests to www.heyjunehandmade.com.

TO PRINT: Open the pattern using Adobe Reader. (If you don't have the program, you can download it free from www.adobe.com/reader. A downloaded version of Adobe Reader tends to help correct any printing issues that can occur with a Microsoft or Mac pdf preview application.) On the left side of your pattern window, you'll see a menu. Choose the layers option, which looks like two overlapping diamond shapes, and is usually the last symbol on the menu. Now you can click in the boxes next to each size to turn them on or off. Make sure the eyeball symbol is visible next to your size, "labels", and "cutting guides". You can turn the other sizes off. Your printed pattern will now only include your size, making it much easier to cut and saving ink. The picture below is an example of only printing size small.

Before printing, be sure that your scaling is set to "no scaling" or "100%". Print page 7 first and measure the test boxes to be sure you're printing to scale. Even 1/16" discrepancy can throw your whole pattern off.

Page 16 is a large format version of the entire pattern, and will print on 36" wide paper at your local print shop.

TAPING GUIDE: Use the following chart as a guide to tape the pattern together. The small triangles will help you line up the pages, and they also indicate where pages will be taped together. If no triangle is present, that side will not be taped.

TIP: The fastest way to trim a PDF pattern is to stack multiple pages and cut off the top and left margins from each page.

CUTTING INSTRUCTIONS

- Cut 1 front on the fold (1)
 - Cut 1 back on the fold (2)
 - Cut 12 straps (3)
 - Cut 2 arm bindings (4)
 - Cut 1 neck binding (5)
- (front and back are shown flat, but need to be cut on the fold)

sizes 2 - 4 (1/2 yard)

sizes 5 - 14 (1 yard)

CHOOSING FABRIC: Knits come in many different weights, fabric contents, and stretch percentages. Depending on the type you use, your final project can vary greatly. You will have best results with this pattern using lightweight yet stable knits such as 100% cotton jersey, cotton spandex, or cotton interlock. Avoid fabrics that could be described as “slinky” or “drapey”.

NOTES ON SEWING WITH KNITS: PREWASH ALL KNITS BEFORE USE. Use a stretch or ballpoint needle, which are designed to produce the best results when sewing on knit fabric. If you have one, use a walking foot where possible to prevent fabric from stretching. Use a stretch stitch, serger, or a lengthened zig zag stitch on all the seams to maintain stretch and prevent snapped threads.

Pressing is a crucial step that will make your garment look professional, but always use a press cloth between your iron and fabric.

SIZING: The Happy Tank is meant to fit like a store-bought knit tank top. Pick size based on chest size and RTW size. The length is generous, so do not size up for length, but you may want to reduce the length before hemming.

All seam allowances are 3/8" unless otherwise stated.
