From Binding Fabric, cut:

Sew the Curves

Step 1: Pair each TEMPLATE A foreground piece with its TEMPLATE B background piece.

Step 2: With right sides together, match the centers. Pin at the center close to the edge of the fabric. Align the edge of the TEMPLATE A with the edge of the TEMPLATE B piece. Pin at these end points. Pin at least one more time between the already placed pins. Repeat for each pair.

Step 3: Using a scant 1/4" seam allowance, stitch along the curve. At every pin, leave the needle in the DOWN position and raise your presser foot. Realign your edges and make sure everything is lining up. Lower your presser foot and remove that pin. Take it slow and carefully. Align the edges as you stitch.

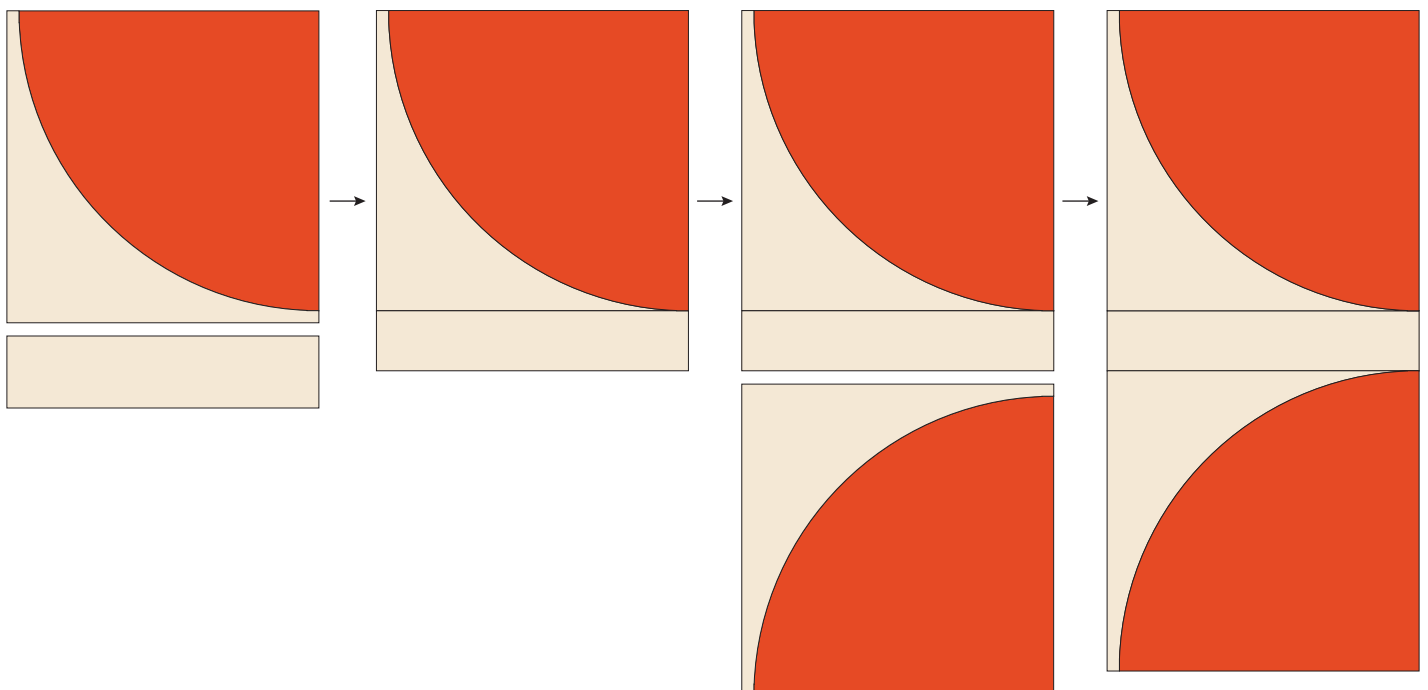

Step 4: Move the sewn pair to your pressing board with the TEMPLATE A piece lying right side up. Push back the TEMPLATE B portion and use a seam roller or finger press the curved seam. With right sides still up, press the TEMPLATE B piece back so that the seam allowance remains behind the TEMPLATE B portion.

Step 5: Repeat for all thirty-nine AB units.

Sew the ABX Units

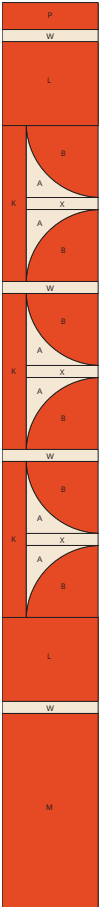

Step 1: Place an AB unit on your table with the "B" portion in the upper right corner, sew an "X" piece to the bottom of fifteen AB units.

Step 2: With the "B" portion still in the upper right corner, sew an AB unit to the bottom of the fifteen ABX units from the previous step, as shown in the diagram overview, with the "B" portion in the lower right corner.
