SIZING CHART - Our patterns are designed to be “true-to-size”. There is not a lot of extra ease loaded into the styles so please choose the size that is closest to your own body measurements. The patterns can be altered to fit your size and shape. We would recommend that you make a test fitting sample before cutting into your main fabric - similar weight fabric to your intended final garment is a must for test fitting. Your test sample can be constructed from the main pattern pieces so you can fine tune for any fit variances.

Sizing your garment will be based on 3 main measurements.

1. Bust Circumference. Horizontal measurement at fullest part of the bust making sure the tape measure is horizontal around the body.
2. Waist Circumference. Horizontal measurement at natural waist (your belly button is not your waist).
3. Hip Circumference. Horizontal measurement at fullest part of your hip line. Try different positions - abdomen, buttocks and high thighs and use the biggest measure.

printing info

PRINTING -

This pattern includes layers that allow you to choose the sizes that you wish to print on both the Print-at-Home and A0 Copy Shop PDF. Please refer to the size chart given at the beginning of these instructions as our garments are “true-to-size”.

In Adobe Reader, click on the layers icon which is on the left hand side of the black navigation bar.

Click on the eyeball to turn the size layers on or off.

If you are grading multiple sizes (please refer to the size chart), make sure to have displayed (turned on) all the sizes you need. Or you can just print your single size if you are standard to the sizing chart. If you are printing at a copy shop, be sure to specify which size/layers you want them to print.

Make sure before printing that your scaling is turned “off” in the printer’s dialogue box and that it is set to scale at 100%. (Or page scaling should be set to none- each printer has a different dialogue box so double check!!). Ensure that page “orientation” is also set to “Auto/portrait Landscape”.

Print out the pattern page that contains the calibration square - page 1.

Measure the square (5cms or 2”) to make sure that your pattern piece was printed to the correct size.

Page 6 details how many tiles for the Jessica Dress and taping order.

pattern tiles

TAPING THE JESSICA DRESS TOGETHER.

Cut off the borders as indicated. You don't have to cut off all edges as we have provided a "symbol" that shows which edges to cut off.

Once all necessary edges are cut you can then tape your pattern together matching the light gray circles and work in numerical order. This is your template after taping together. The template consists of 33 pattern tiles. Tiles run 1-7 across the top of the template and the subsequent tiles run as shown in the diagram. Please ensure that you match up the circle symbol when taping the edges.

SHOPPING LIST

- Fabric and matching color thread.
- A minimum of 9 x 5/8" buttons (15mm) but this is dependent on how many buttons you desire and combination placement.
- 1/2 yard (.50mt) of light weight iron-on interfacing.

FABRIC

Please use the following only as a suggestion. Depending on your skill level you should choose the appropriate weight fabric.

Cottons, Poly-Cotton, Rayon-Cotton, Linen, Linen mixes, Chambray types, Gauze and double gauze types.

SEAM ALLOWANCES are included. All main seams have 3/8" (1cm) unless otherwise stated. THIS WILL BE CLEARLY INDICATED AT EACH STEP METHOD.

STORING YOUR PATTERN - As this pattern is a multi-sized one it is best to trace off your size with tissue or similar paper and leave the taped template intact. That way if you happen to have a missing pattern piece or you need to make body size adjustments in the future you will still have the master at hand. For storage of the master you could hang it up with bull-dog clips on a coat hanger in a spare wardrobe or fold it flat and store in a large zip-lock bag.

TERMS OF USE

PRE-WASH YOUR FABRICS

Wash your fabrics as you would wash any similar garment. Your fabric must be washed/laundered prior to cutting out your garment as this will circumvent any shrinkage that may occur in your fabric. If you are not sure how your fabric will react please wash a test square first. If there is no change to the test square fabric then it can be laundered successfully either by a gentle machine wash setting or by hand washing.

Follow the relevant Size Key line for your size as defined in this chart.

DEFINITIONS.

STAY STITCHING - a row of larger length machine stitches that prevents the garment edge from stretching while handling.

UNDER STITCHING - a row of machine stitching to keep the seam allowance “under” the garment. Made by pressing seam allowance towards the facing and then stitching close to the edge ($\frac{1}{8}$ " (2-3mm)) of the seam on the facing side on the top-side of the garment. Ensure that the seam allowance is caught on the underside.

TOP STITCHING - A row of stitching very close to the edge of a seam or garment. It is also known as edge-stitching - and hence the name - sew on the top-side of the garment.

WRST - With right sides of fabric together.

CF - Centre Front

CB - Centre Back

fabric req's

Using the following Fabric Requirements chart.

This is only to be used as a guide. It is **HIGHLY** recommended that once you have your pattern pieces ready you use a piece of fabric from your stash and lay out your pattern using the layout guide. If you lay your pattern pieces you **WILL** be able to calculate your yardage/ meterage as less than indicated in the charts.

Fabric Requirements (Yards/Metres)

Additional fabric may be required for directional/one way print designs
