

Embroidered Velvet Hoodie

This project started as an experiment. I wanted to make a floral embroidered velvet hoodie. Very happily I thought I had found the perfect fabric at my local fabric store. A beautiful embroidered knit and on sale too. Upon approaching the counter, the lady tells me I owe \$280 dollars for a yard and a half of fabric!

I thought I heard wrong and extended my body around to see the number in the cash register --yep, I had heard right-- that's the number. I inspected the fabric and ask, is this silk or gold maybe?? Nope, 100% pure polyester. Had I known the price and fiber content of the fabric I would have never picked this roll of fabric. The cashier and I get into an argument: "I cut the fabric so you should pay" and from me "there was no price and how can you charge so much for polyester? Plus I found it in a pile under a 30% off sign". Eventually, I prevail and leave without the beautiful but insanely expensive knit.

So I got to thinking, what if I just add the embroidery myself and save the \$200 dollars? A little problem....my machine is useless when it comes to embroidery. I can do quite a lot with it if I am inclined to work and put the time in, but the best I can usually hope for from it is [common sewing stitches](#). I decided to use embroidered patches instead to achieve the look I was hoping for while keeping the costs down.

This is a new pattern and I've changed the design based on lots of reader feedback. There's now a bit more room in this hoodie pattern compared with the prior version. If you had the opportunity of making the [first hoodie](#) then this one is going to be even easier to make. The interfacing, lining, and pockets are all optional.

To print your PDF pattern

Your pattern pieces come at the end of these instructions. For accurate printing, please make sure you are using the latest version of Adobe Reader. You can [download the latest version here](#) if you need to.

Select File → Print and the print dialogue box opens. Under Page Sizing and Handling, select ACTUAL SIZE . Check the preview in the right hand side illustration. Select the page numbers you want to print. You can print the whole document, or just the pattern pieces.

On the edge of the top left page is a box you can use to test your printing. This box should measure 2 inches square. If yours is wildly different you will need to check your printer options to make sure the pages are not being resized.

Use the grey guides on the overlap of the sheets to match up the pattern pieces, folding under or cutting off any overlaps, tape together and cut out your pattern pieces.
