

PRINTING AND ASSEMBLING INSTRUCTIONS

Printing: Download and save your pattern.

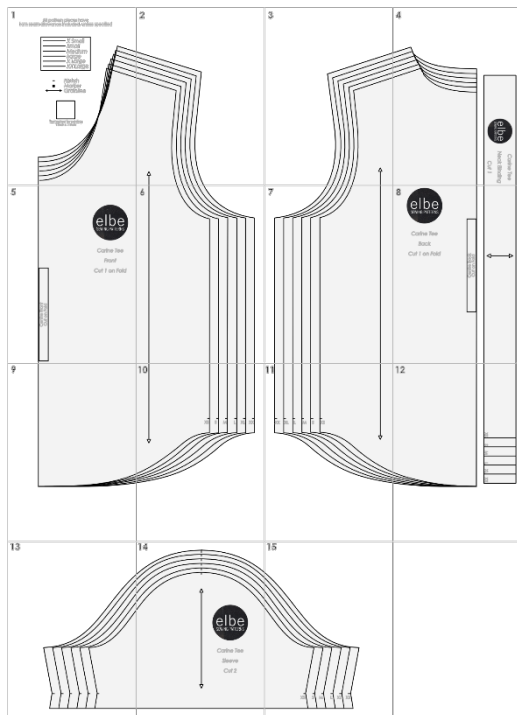

Open in a PDF reader, such as Adobe Acrobat.

Please note: These patterns are designed for both A4 and Letter size paper. There is an A0 file option to take to a printer if you prefer.

Before printing, confirm your size option is set to 'Actual Size'. This is a very important step to ensure accuracy in sizing. Do not check the 'Fit to Page' option.

For more economical printing, change your printing properties to Greyscale and choose the Draft option.

To check the pattern is printing to scale, there is a test square measuring 1 inch by 1 inch and 5cm by 5cm on the first page of every pattern. Print this first page only to check the scale. Once you've checked this is correct you can print the rest of the pattern pages.

Assembling: Cut along the outside edge of the right hand side border and bottom border of each page. Overlap and align your pages so the borders are matching at the corners. Tape or glue in place.

Once your pages are all taped/glued together, you can cut out the pattern pieces as you would with a standard pattern.
