

Gardening Tool Belt Pattern

This gardening tool belt is my project for Father's Day and my gift to all the handy mamas who read this blog.

I am well aware that I don't really share many projects for men on this site, so this is my attempt to balance things out a little. Having said that, in my house I think this tool belt may not make it to anyone else's waist but my own. One reason is because of the color combination. If I had olive green/black canvas or nylon, things would be different, but I don't have these colors on hand right now.

The gardening tool belt has a main pouch and one additional pocket. You can easily add another pocket if you choose. I think this decision you will have to make according to the number of tools you have.

There is space for 8 tools including the extra pocket. There is an extra layer that I decided to add for flat seed packs and a phone. I like to listen to music or a book on Audible to help pass the time in the garden.

The main pouch is 12" in width and 9" in length. The small pouch is 9" long and 5" wide.

Experience level: Intermediate

To print your PDF pattern

Your pattern pieces come at the end of these instructions. For accurate printing, please make sure you are using the latest version of Adobe Reader. You can [download the latest version here](#) if you need to.

Select File → Print and the print dialogue box opens. Under Page Sizing and Handling, select ACTUAL SIZE. Check the preview in the right hand side illustration. Select the page numbers you want to print. You can print the whole document, or just the pattern pieces.

On the edge of the top left page is a box you can use to test your printing. This box should measure 2 inches square. If yours is wildly different you will need to check your printer options to make sure the pages are not being resized.

Use the grey guides on the overlap of the sheets to match up the pattern pieces, folding under or cutting off any overlaps, tape together and cut out your pattern pieces.

Help printing and assembling your pattern

You can find helpful tutorials on how to download, print and assemble PDF sewing patterns here:
