PRINTING AND PATTERN ASSEMBLY

Select printer paper size A4 or US Letter.

Most importantly, you have to make sure that you are printing the pattern in the correct size and that it is printed centered on the page.

Therefore, make sure you select „Actual Size“ (German: “Tatsächliche Größe”), or select “Scale: 100%,” and measure the test square once you printed the first page.

If the test square measurement is correct, you can continue to print the remaining pages.

To ensure that your pattern is printed centered on the page, you might also have to set the orientation to „Auto.“ (German: “Ausrichtung: Auto”)

Once you have all the pages printed out, you will have to assemble the pattern pieces by trimming the edges and lining up the gray diamonds.
