

Small Fringed Tote Bag Pattern

For this weekend's project, we have the Small Fringed Tote Bag pattern. Bag making is my go-to project when I get a bit bored with making clothing. I love making bags because there is no fitting to do, plus I can push myself by using different materials and techniques as a sort of extra puzzle.

I am using woven tapestry fabric that can be used on either side. This assembly technique I am sharing with you will not work with a printed fabric. I found mine at an interior design shop that sells their leftover fabric, or offcuts. Normally these places just want to get rid of the leftovers from jobs and there are normally just a couple of meters left.

This small tote bag has an inside pocket big enough for a wallet and a phone. The rest of the bag is big enough for a small iPad, a book, and sunglasses. I have also sewn-in two D-rings to convert the bag into a crossbody bag so your arms are free.

Of course, you can always add more zippered pockets just by following linked [here](#) and in the instructions.

To print your PDF pattern

Your pattern pieces come at the end of these instructions. For accurate printing, please make sure you are using the latest version of Adobe Reader. You can [download the latest version here](#) if you need to.

Select File → Print and the print dialogue box opens. Under Page Sizing and Handling, select ACTUAL SIZE. Check the preview in the right hand side illustration. Select the page numbers you want to print. You can print the whole document, or just the pattern pieces.

On the edge of the top left page is a box you can use to test your printing. This box should measure 2 inches square. If yours is wildly different you will need to check your printer options to make sure the pages are not being resized.

Use the grey guides on the overlap of the sheets to match up the pattern pieces, folding under or cutting off any overlaps, tape together and cut out your pattern pieces.
